ARTES 460|560

The relay test systems of the ARTES 460|560 generation use innovative technology to meet all your test requirements, however complex they may be. ARTES 460|560 systems feature up to four voltage and six current signal sources with a very high output power.

- Extremely robust, compact and light
- Amplifiers with a very high output power
- Test currents of up to 3 x 64 A
- Ergonomic design with touch screen and jog wheel
- Intuitive, easy-to-learn software for automatic test sequences
- A wide range of functions at a very competitive price

With new user interface for stand-alone operation!
